

Human Vanin 1 (VNN1) ELISA Kit | VNN1 elisa kit

Human Vanin 1 (VNN1) ELISA Kit

CATALOG #
AAA20755

REACTIVITY
Human

PRODUCT SYNONYMS

Vanin 1 (VNN1); Human Vanin 1 (VNN1) ELISA Kit; Pantetheinase; Pantetheine hydrolase; Tiff66; Vascular non-inflammatory molecule 1; VNN1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of VNN1. No significant cross-reactivity or interference between VNN1 and analogues was observed.
Sequence Length	513
Assay Type	Quantitative Sandwich
Samples	Human serum, plasma, urine, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.059ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level VNN1 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level VNN1 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for VNN1 elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to VNN1. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to VNN1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain VNN1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of VNN1 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of VNN1 in human serum, plasma, urine, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.
Product Categories/Family for VNN1 elisa kit	Infection immunity

NCBI AND UNIPROT INFORMATION

NCBI GI #	119568405
NCBI GeneID	8876
UniProt Accession #	O95497; Q4JFW6; Q4VAS7; Q4VAS8; Q4VAS9; Q9UF16; Q9UJF4; A8K310
Molecular Weight	57,012 Da
NCBI Official Full Name	vanin 1
NCBI Official Synonym Full Names	vanin 1
NCBI Official Symbol	VNN1
NCBI Official Synonym Symbols	HDLCQ8; Tiff66
NCBI Protein Information	pantetheinase
UniProt Protein Name	Pantetheinase
UniProt Gene Name	VNN1
UniProt Synonym Gene Names	Vanin-1
UniProt Entry Name	VNN1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
