

## Rat Macrophage-Derived Chemokine ELISA Kit | CCL22 elisa kit

Rat Macrophage-Derived Chemokine ELISA Kit

CATALOG #  
**AAA210254**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

Macrophage-Derived Chemokine; Rat Macrophage-Derived Chemokine ELISA Kit; CCL22 elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Rat                                                               |
| Sequence Length | 93                                                                |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 200 pg/ml-3200 pg/ml                                              |
| Sensitivity     | 10 pg/ml                                                          |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for CCL22 elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Rat Macrophage-Derived Chemokine in the sample, This Rat Macrophage-Derived Chemokine Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Rat Macrophage-Derived Chemokine concentration. The concentration of Rat Macrophage-Derived Chemokine in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|             |          |
|-------------|----------|
| NCBI GI #   | 22538804 |
| NCBI GeneID | 6367     |
