IP (Immunoprecipitation)

Detection of human ZFP106 by western blot of immunoprecipitates. Samples: Nuclear Extract (0.5 or 1.0 mg per IP reaction; 20% of IP loaded) from HEK293T cells. Antibodies: Affinity purified rabbit anti-ZFP106 antibody AAA211517 (lot AAA211517-2) used for IP at 6 ug per reaction. ZFP106 was also immunoprecipitated by rabbit anti-ZFP106 antibody For blotting immunoprecipitated ZFP106, AAA211517 was used at 1 ug/ml. Detection: Chemiluminescence with an exposure time of 75 seconds.

IHC (Immunohistochemistry)

Detection of human ZFP106 by immunohistochemistry. Sample: FFPE section of human breast carcinoma. Antibody: Affinity purified rabbit anti-ZFP106 (Cat. No. AAA211517 Lot2) used at a dilution of 1:1,000 (1ug/ml). Detection: DAB

ADDITIONAL INFORMATION

Related Product Information for anti-ZFP106 antibody	Zinc finger protein homolog 106 (ZFP106) is a C2H2-type zinc finger protein that also contains 2 WD repeats. ZFP106 is highly expressed in striated muscle, brown fat, and developing brain and is regulated by myogenin and nuclear respiratory factor-1 (NRF-1). ZFP106 localizes to the nucleus in association with nucleolar transcriptional machinery. The WD40 repeat in ZFP106 appears to facilitate targeting of ZFP106 to the nucleolus and to mediate the interaction between ZFP106 and testis-specific gene 118 (TSF118). A two-hybrid screen has identified testis-specific Y-encoded-like protein (TSPYL) as a ZFP106 interacting protein. These data suggest an important role for ZFP106 in testis development.
