IMAGES

WB (Western Blot)

Detection of human and mouse IPO9 by western blot. Samples: Whole cell lysate (50 ug) from HeLa, HEK293T, Jurkat, mouse TCMK-1, and mouse NIH 3T3 cells prepared using NETN lysis buffer. Antibody: Affinity purified rabbit anti-IPO9 antibody AAA213278 (lot AAA213278-1) used for WB at 0.1 ug/ml. Detection: Chemiluminescence with an exposure time of 10 seconds.

IP (Immunoprecipitation)

Detection of human IPO9 by western blot of immunoprecipitates. Samples: Whole cell lysate (0.5 or 1.0 mg per IP reaction; 20% of IP loaded) from HeLa cells prepared using NETN lysis buffer. Antibodies: Affinity purified rabbit anti-IPO9 antibody AAA213278 (lot AAA213278-1) used for IP at 6 ug per reaction. IPO9 was also immunoprecipitated by rabbit anti-IPO9 antibody A305-474A. For blotting immunoprecipitated IPO9, AAA213278 was used at 1 ug/ml. Detection: Chemiluminescence with an exposure time of 30 seconds.

ADDITIONAL INFORMATION

Related Product Information for anti-IPO9 antibody	Importin-9 (IPO9) functions in nuclear protein import as a nuclear transport receptor. IPO9 serves as receptor for nuclear localization signals (NLS) in cargo substrates. It is thought to mediate docking of the importin/substrate complex to the nuclear pore complex (NPC) through binding to nucleoporin and the complex is subsequently translocated through the pore by an energy requiring, Ran-dependent mechanism. At the nucleoplasmic side of the NPC, Ran binds to the importin, the importin/substrate complex dissociates and importin is re-exported from the nucleus to the cytoplasm where GTP hydrolysis releases Ran. The directionality of nuclear import is thought to be conferred by an asymmetric distribution of the GTP- and GDP-bound forms of Ran between the cytoplasm and nucleus (By similarity). IPO9 mediates the nuclear import of H2B histone (By similarity), RPS7 and RPL18A. It prevents the cytoplasmic aggregation of RPS7 and RPL18A by shielding exposed basic domains. IPO9 may also import H2A, H3, H4 histones (By similarity), RPL4 and RPL6 [taken from the Universal Protein Resource (UniProt) www.uniprot.org/uniprot/Q96P70].
