

Mouse MAPK14 Monoclonal Antibody | anti-MAPK14 antibody

MAPK14

CATALOG # AAA214728	HOST Mouse	REACTIVITY Human. Others not tested.	APPLICATIONS Western Blot
-------------------------------	----------------------	--	-------------------------------------

PRODUCT SYNONYMS

MAPK14; Monoclonal Antibody; CSBP; CSBP1; CSBP2; CSPB1; MXI2; SAPK2A; p38; PRKM15; anti-MAPK14 antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human. Others not tested.
Clonality	Monoclonal
Isotype	IgG1
Clone Number	CPTC-MAPK14-1
Specificity	The protein encoded by this gene is a member of the MAP kinase family. MAP kinases act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. This kinase is activated by various environmental stresses and proinflammatory cytokines. The activation requires its phosphorylation by MAP kinase kinases (MKKs), or its autophosphorylation triggered by the interaction of MAP3K7IP1/TAB1 protein with this kinase. The substrates of this kinase include transcription regulator ATF2, MEF2C, and MAX, cell cycle regulator CDC25B, and tumor suppressor p53, which suggest the roles of this kinase in stress related transcription and cell cycle regulation, as well as in genotoxic stress response. Four alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. It has been implicated in various cancer pathologies and depending on the context, can facilitate or interfere with tumor development, and therefore has immense potential therapeutic interest.
Purity/Purification	Purified Ab with BSA and Azide at 200ug/ml OR Purified Ab WITHOUT BSA and Azide at 1.0mg/ml
Form/Format	200ug/ml of Ab purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.
Sequence Length	360
Applicable Applications for anti-MAPK14 antibody	WB (Western Blot)
Immunogen	Recombinant humanfull lengthprotein
Positive Control	Jurkat, C6, NIH/3T3 or HeLa cell lysate.
Cellular Localization	Nucleus and cytoplasm.
Chromosome Location	6p21.31
Preparation and Storage	Antibody with azide - store at 2 to 8 degree C. Antibody without azide - store at -20 to -80 degree C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

IHC (Immunohistochemistry)
Formalin-fixed, paraffin-embedded human Colonstained with MAPK14 Mouse Monoclonal Antibody (CPTC-MAPK14-1).

Application Data
Analysis of Protein Array containing more than 19,000 full-length human proteins using MAPK14 Mouse Monoclonal Antibody (CPTC-MAPK14-1). Z- and S- Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProt™ array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If targets on HuProt™ are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.
