

Mouse TCC C5b-9 ELISA Kit | TCC C5b-9 elisa kit

Mouse TCC C5b-9 (Terminal Complement Complex C5b-9) ELISA Kit

CATALOG #
AAA21478

REACTIVITY
Mouse

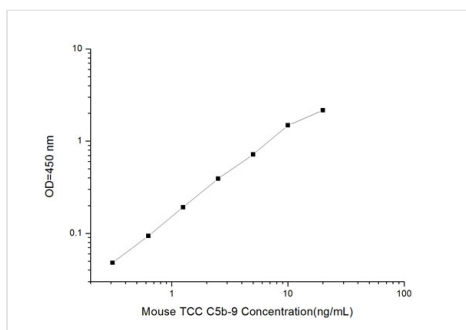

PRODUCT SYNONYMS

TCC C5b-9; Mouse TCC C5b-9 (Terminal Complement Complex C5b-9) ELISA Kit; TCC C5b-9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This kit recognizes Mouse TCC C5b-9 in samples. No significant cross-reactivity or interference between Mouse TCC C5b-9 and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Serum, plasma and other biological fluids
Detection Range	0.31-20ng/mL
Sensitivity	0.19ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Mouse TCC C5b-9 were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Mouse TCC C5b-9 were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for TCC C5b-9 elisa kit	Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse TCC C5b-9. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Mouse TCC C5b-9 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse TCC C5b-9, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Mouse TCC C5b-9. You can calculate the concentration of Mouse TCC C5b-9 in the samples by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Mouse TCC C5b-9 concentrations in serum, plasma and other biological fluids.
