

Mouse Insulin Degrading Enzyme (IDE) RTU ELISA Kit | IDE rtu elisa kit

Mouse Insulin Degrading Enzyme (IDE) ELISA Kit

CATALOG #
AAA216122

REACTIVITY
Mouse

PRODUCT SYNONYMS

Insulin Degrading Enzyme (IDE); Mouse Insulin Degrading Enzyme (IDE) ELISA Kit; Insulysin; Insulin Protease; Abeta-degrading protease; Insulinase; IDE rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Sequence Length	1019
Assay Type	Sandwich
Samples	Serum, Plasma, Tissue Homogenates or Other Biological Fluids.
Detection Range	3.12-200pg/mL
Sensitivity	1.33pg/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for IDE rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to IDE. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to IDE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain IDE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of IDE in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	14548072
NCBI GeneID	15925
UniProt Accession #	Q9JHR7
Molecular Weight	117,772 Da
NCBI Official Full Name	Insulin-degrading enzyme
NCBI Official Synonym Full Names	insulin degrading enzyme
NCBI Official Symbol	Ide
NCBI Official Synonym Symbols	AA675336; AI507533; 1300012G03Rik; 4833415K22Rik
NCBI Protein Information	insulin-degrading enzyme
UniProt Protein Name	Insulin-degrading enzyme
UniProt Gene Name	Ide
UniProt Synonym Gene Names	Insulinase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
