

Dog Interferon Beta (IFN β) RTU ELISA Kit | IFN β rtu elisa kit

Canine Interferon Beta (IFN β) ELISA Kit

CATALOG #
AAA216149

REACTIVITY
Dog

PRODUCT SYNONYMS

Interferon Beta (IFN β); Canine Interferon Beta (IFN β) ELISA Kit; IFNB1; IFN-B; IFB; IFF; IFNB; Interferon Beta 1 Fibroblast; IFN β rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Dog
Sequence Length	186
Assay Type	Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates or Other Biological Fluids.
Detection Range	15.6-1000pg/mL
Sensitivity	5.6pg/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for IFN β rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to IFN β . Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to IFN β . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain IFN β , biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of IFN β in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #

209417932

NCBI GeneID	481558
NCBI Accession #	NP_001129259.1
NCBI GenBank Nucleotide #	NM_001135787.1
UniProt Accession #	B6E116
Molecular Weight	22,388 Da
NCBI Official Full Name	interferon beta
NCBI Official Symbol	IFNB1
NCBI Protein Information	interferon beta
UniProt Protein Name	Interferon-beta
UniProt Gene Name	IFN-beta

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
