

Mouse Inhibin A (INHA) RTU ELISA Kit | INHA rtu elisa kit

Mouse Inhibin A (INHA) ELISA Kit

CATALOG #
AAA216486

REACTIVITY
Mouse

PRODUCT SYNONYMS

Inhibin A (INHA); Mouse Inhibin A (INHA) ELISA Kit; INH-A; INHA rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Sequence Length	366
Assay Type	Sandwich
Samples	Serum, Plasma or Other Biological Fluids.
Detection Range	15.6-1000pg/mL
Sensitivity	6.1pg/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for INHA rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to INHA. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to INHA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain INHA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of INHA in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #

40254367

NCBI GeneID	16322
NCBI Accession #	NP_034694.3
NCBI GenBank Nucleotide #	NM_010564.5
UniProt Accession #	Q04997 ; Q6GTG7
Molecular Weight	39,550 Da
NCBI Official Full Name	inhibin alpha chain isoform 1 preproprotein
NCBI Official Synonym Full Names	inhibin alpha
NCBI Official Symbol	Inha
NCBI Official Synonym Symbols	AW555078
NCBI Protein Information	inhibin alpha chain
UniProt Protein Name	Inhibin alpha chain
UniProt Gene Name	Inha

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
