

Human ACTH ELISA Kit | ACTH elisa kit

Human ACTH (Adrenocorticotrophic Hormone) ELISA Kit

CATALOG #
AAA21771

REACTIVITY
Human

PRODUCT SYNONYMS

ACTH; Human ACTH (Adrenocorticotrophic Hormone) ELISA Kit; ACTH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This kit recognizes Human ACTH in samples. No significant cross-reactivity or interference between Human ACTH and analogues was observed.
Sequence Length	41
Samples	Serum, plasma and other biological fluids
Assay Type	Quantitative Competitive
Detection Range	15.63-1000pg/mL
Sensitivity	9.38pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Human ACTH were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Human ACTH were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for ACTH elisa kit	Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Human ACTH concentrations in serum, plasma and other biological fluids. Principle of the Assay: This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Human ACTH. During the reaction, Human ACTH in the sample or standard competes with a fixed amount of Human ACTH on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Human ACTH. Excess conjugate and unbound sample or standard are washed from the plate, and Avidin conjugated to Horseradish Peroxidase (HRP) are added to each microplate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The concentration of Human ACTH in the samples is then determined by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	490074
NCBI Official Full Name	ACTH, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
