

Rat Prolylcarboxypeptidase (PRCP) RTU ELISA Kit | PRCP rtu elisa kit

Rat Prolylcarboxypeptidase (PRCP) ELISA Kit

CATALOG #
AAA217966

REACTIVITY
Rat

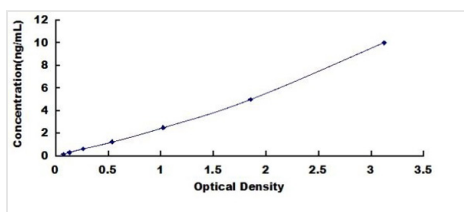

PRODUCT SYNONYMS

Prolylcarboxypeptidase (PRCP); Rat Prolylcarboxypeptidase (PRCP) ELISA Kit; PCP; HUMPCP; Lysosomal Pro-X Carboxypeptidase; Angiotensinase C; Lysosomal carboxypeptidase C; Proline carboxypeptidase; PRCP rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Sequence Length	493
Assay Type	Sandwich
Samples	Serum, Plasma, Tissue Homogenates or Other Biological Fluids.
Detection Range	0.156-10ng/mL
Sensitivity	0.042ng/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for PRCP rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to PRCP. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to PRCP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain PRCP, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of PRCP in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	166064014
NCBI GeneID	293118
NCBI Accession #	NP_001099751.2
NCBI GenBank Nucleotide #	NM_001106281.2
UniProt Accession #	D4AA31
Molecular Weight	55,562 Da
NCBI Official Full Name	lysosomal Pro-X carboxypeptidase
NCBI Official Synonym Full Names	prolylcarboxypeptidase
NCBI Official Symbol	Prpc
NCBI Protein Information	lysosomal Pro-X carboxypeptidase
UniProt Protein Name	Prolylcarboxypeptidase
UniProt Gene Name	Prpc

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
