

## Human IL-12 p35 ELISA Kit | IL-12 p35 elisa kit

Human IL-12 p35 (Interleukin 12 p35) ELISA Kit

CATALOG #  
**AAA21922**

REACTIVITY  
**Human**

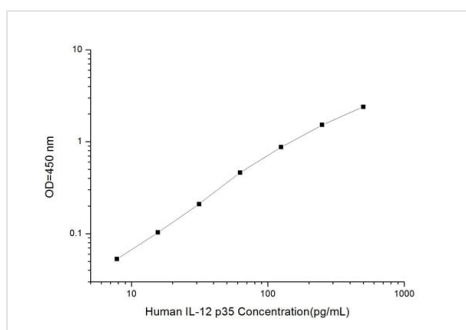

### PRODUCT SYNONYMS

IL-12 p35; Human IL-12 p35 (Interleukin 12 p35) ELISA Kit; IL-12 p35 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                          |
| Specificity             | This kit recognizes Human IL-12 p35 in samples. No significant cross-reactivity or interference between Human IL-12 p35 and analogues was observed.                            |
| Sequence Length         | 253                                                                                                                                                                            |
| Assay Type              | Quantitative Sandwich                                                                                                                                                          |
| Samples                 | Serum, plasma and other biological fluids                                                                                                                                      |
| Detection Range         | 7.81-500pg/mL                                                                                                                                                                  |
| Sensitivity             | 4.69pg/mL                                                                                                                                                                      |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Human IL-12 p35 were tested 20 times on one plate, respectively.               |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Human IL-12 p35 were tested on 3 different plates, 20 replicates in each plate. |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                                           |

| Related Product Information for IL-12 p35 elisa kit | <p>Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human IL-12 p35. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human IL-12 p35 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human IL-12 p35, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Human IL-12 p35. You can calculate the concentration of Human IL-12 p35 in the samples by comparing the OD of the samples to the standard curve.</p> <p>Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Human IL-12 p35 concentrations in serum, plasma and other biological fluids.</p> |
