

## Human Macrosialin RTU ELISA Kit | CD68 rtu elisa kit

Human Macrosialin ELISA Kit

CATALOG #  
**AAA219727**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Macrosialin; Human Macrosialin ELISA Kit; CD68 molecule; macrophage antigen CD68; CD68 antigen; GP110; LAMP4; SCARD1; macrosialin; scavenger receptor class D; member 1; CD68 rtu elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                 |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                                           |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Macrosialin. No significant cross-reactivity or interference between Macrosialin and analogues was observed.                         |
| Sequence Length         | 354                                                                                                                                                                                                             |
| Samples                 | Human Serum, Plasma, Tissue Homogenates Or Other Biological Fluids                                                                                                                                              |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                                           |
| Detection Range         | 0.312-20ng/mL                                                                                                                                                                                                   |
| Sensitivity             | 0.120ng/mL.                                                                                                                                                                                                     |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Macrosialin were tested 20 times on one plate, respectively. Intra-Assay: CV<10%                                   |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Macrosialin were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12% |
| Preparation and Storage | For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.      |

ADDITIONAL INFORMATION

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for CD68 rtu elisa kit | <p>Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of Macrosialin in human serum, plasma, tissue homogenates or other biological fluids.</p> <p>Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to Macrosialin. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to Macrosialin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Macrosialin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Macrosialin in the samples is then determined by comparing the O.D. of the samples to the standard curve.</p> |
