

Mouse Hepatocyte Cell Adhesion Molecule (HepaCAM) ELISA Kit | Hepacam elisa kit

Mouse Hepatocyte Cell Adhesion Molecule (HepaCAM) ELISA Kit

CATALOG #
AAA219796

REACTIVITY
Mouse

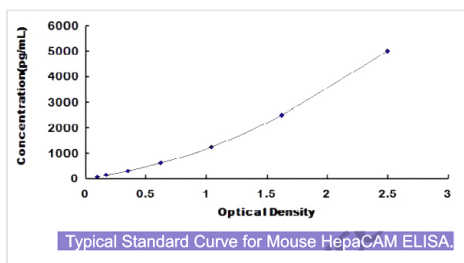

PRODUCT SYNONYMS

Hepatocyte Cell Adhesion Molecule (HepaCAM); Mouse Hepatocyte Cell Adhesion Molecule (HepaCAM) ELISA Kit; glialCAM; Hepacam elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of HepaCAM. No significant cross-reactivity or interference between HepaCAM and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Mouse serum, plasma or other biological fluids
Detection Range	78.1-5000pg/mL
Sensitivity	< 27pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level HepaCAM were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level HepaCAM were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	Shelf Life: 12 months

ADDITIONAL INFORMATION

Related Product Information for Hepacam elisa kit	Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to HepaCAM. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to HepaCAM. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain HepaCAM, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of HepaCAM in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of HepaCAM in mouse serum, plasma or other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	56790921
NCBI GeneID	72927
NCBI Accession #	NP_780398.2
NCBI GenBank Nucleotide #	NM_175189.4
UniProt Accession #	Q640R3
Molecular Weight	46,367 Da
NCBI Official Full Name	hepatocyte cell adhesion molecule
NCBI Official Synonym Full Names	hepatocyte cell adhesion molecule
NCBI Official Symbol	Hepacam
NCBI Official Synonym Symbols	Hepn1; 2900042E01Rik
NCBI Protein Information	hepatocyte cell adhesion molecule; protein hepaCAM
UniProt Protein Name	Hepatocyte cell adhesion molecule
UniProt Gene Name	Hepacam
UniProt Synonym Gene Names	Protein hepaCAM
UniProt Entry Name	HECAM_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
