

Mouse LH (Luteinizing Hormone) ELISA Kit | LH elisa kit

Mouse LH (Luteinizing Hormone) ELISA Kit

CATALOG #
AAA22148

REACTIVITY
Mouse

PRODUCT SYNONYMS

LH (Luteinizing Hormone); Mouse LH (Luteinizing Hormone) ELISA Kit; LH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This kit recognizes Mouse LH in samples. No significant cross-reactivity or interference between Mouse LH and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Serum and plasma, please inquiry if your samples are other biological fluids
Detection Range	0.31-20ng/mL
Sensitivity	0.19ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Mouse LH were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Mouse LH were tested on 3 different plates, 20 replicates in each plate.

ADDITIONAL INFORMATION

Related Product Information for LH elisa kit	Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse LH. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Mouse LH and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse LH, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 ± 2 nm. The OD value is proportional to the concentration of Mouse LH. You can calculate the concentration of Mouse LH in the samples by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Mouse LH concentrations in serum and plasma, please inquiry if your samples are other biological fluids.
