### PRODUCT SYNONYMS

Hydromorphone; Polyclonal Antibody; Sheep polyclonal Hydromorphone antibody; Polyclonal Hydromorphone antibody; Anti-Hydromorphone antibody; Dihydromorphinone antibody; Palladone antibody; Dilaudid antibody; anti-Hydromorphone antibody

### PRODUCT SPECIFICATIONS

|                                                         |                                                                                                                         |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Host                                                    | Sheep                                                                                                                   |
| Clonality                                               | Polyclonal                                                                                                              |
| Form/Format                                             | Ig fraction supplied in liquid form in 20 mM Phosphate, pH 7.2, with 150 mM Sodium Chloride, and 0.09% NaN <sub>3</sub> |
| Concentration                                           | 7.28mg/ml (U.V. abs @ 280nm) (varies by lot)                                                                            |
| Applicable Applications for anti-Hydromorphone antibody | ELISA                                                                                                                   |
| Immunogen                                               | Hydromorphone(3)-BTG                                                                                                    |
| Preparation and Storage                                 | Ships on blue ice. Upon receipt, store at -20°C. Avoid repeat freeze-thaws.                                             |

### ADDITIONAL INFORMATION

|                                                             |                                                                                                                                                                                                                                                                                             |

| Related Product Information for anti-Hydromorphone antibody | Hydromorphone is a very potent centrally acting analgesic drug of the opioid class. It is a derivative of morphine; to be specific, a hydrogenated ketone thereof, and it can be said that hydromorphone is to morphine as hydrocodone is to codeine and, therefore, a semi-synthetic drug. |
| Product Categories/Family for anti-Hydromorphone antibody   | <a href="#">Drugs &amp; Toxicology</a>                                                                                                                                                                                                                                                      |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
