

## Rabbit Ferritin Polyclonal Antibody

Ferritin Antibody

|                               |                       |                                                                  |
|-------------------------------|-----------------------|------------------------------------------------------------------|
| CATALOG #<br><b>AAA225047</b> | HOST<br><b>Rabbit</b> | APPLICATIONS<br><b>Immunocytochemistry, Immunohistochemistry</b> |
|-------------------------------|-----------------------|------------------------------------------------------------------|

### PRODUCT SYNONYMS

Ferritin; Polyclonal Antibody; Ferritin Antibody; Rabbit Polyclonal Ferritin Antibody; Polyclonal Ferritin antibody; Anti-Ferritin antibody; Ferritin H subunit antibody; Ferritin light chain like antibody; Ferritin L subunit antibody; FTH antibody; Ferritin light polypeptide antibody; Ferritin heavy polypeptide antibody; Ferritin heavy polypeptide 1 antibody; Ferritin heavy chain like antibody; anti-Ferritin antibody

### PRODUCT SPECIFICATIONS

|                                                    |                                                                                                                    |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
| Host                                               | Rabbit                                                                                                             |
| Clonality                                          | Polyclonal                                                                                                         |
| Isotype                                            | IgG                                                                                                                |
| Specificity                                        | Human                                                                                                              |
| Purity/Purification                                | Ferritin antibody was purified by Protein A Chromatography                                                         |
| Form/Format                                        | Protein A purified in 10 mM PO <sub>4</sub> , 150 mM NaCl, pH 7.4 with 1% BSA, 0.05% sodium azide as preservative. |
| Concentration                                      | 3.0mg/mL (varies by lot)                                                                                           |
| Applicable Applications for anti-Ferritin antibody | ICC (Immunocytochemistry), IHC (Immunohistochemistry)                                                              |
| Immunogen                                          | Purified human Spleen Ferritin                                                                                     |
| Cross-Reactivity                                   | Human, others not tested                                                                                           |
| Biohazard Information                              | This product contains 0.05% sodium azide as a preservative, appropriate care should be taken in handling.          |
| Assay Information                                  | This Ferritin antibody is also available in a pre-diluted ready-to-use format especially for IHC under catalog no. |
| Preparation and Storage                            | Store at 4°C.                                                                                                      |

### ADDITIONAL INFORMATION

|                                                        |                                                                                                                                                                                                                                                                                                      |
|--------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for anti-Ferritin antibody | Ferritin is a ubiquitous intracellular protein that stores iron and releases it in a controlled fashion. The protein is produced by almost all living organisms, including bacteria, algae and higher plants, and animals. In humans, it acts as a buffer against iron deficiency and iron overload. |
| Product Categories/Family for anti-Ferritin antibody   | <a href="#">Nutrition &amp; Metabolism</a>                                                                                                                                                                                                                                                           |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
