

# Rabbit Lamin B2 Polyclonal Antibody | anti-LMNB2 antibody

Lamin B2 Antibody

|                               |                       |                                                           |
|-------------------------------|-----------------------|-----------------------------------------------------------|
| CATALOG #<br><b>AAA225475</b> | HOST<br><b>Rabbit</b> | APPLICATIONS<br><b>Western Blot, Immunohistochemistry</b> |
|-------------------------------|-----------------------|-----------------------------------------------------------|

## PRODUCT SYNONYMS

Lamin B2; Polyclonal Antibody; Lamin B2 Antibody; Affinity Purified Rabbit Polyclonal Lamin B2 Antibody; Polyclonal Lamin B2 antibody; Anti-Lamin B2 antibody; LAMB2 antibody; Lamin B 2 antibody; Lamin B-2 antibody; LMNB2 antibody; Lamin B-2; lamin-B2 antibody; lamin B2 antibody; LMN2 antibody; MGC2721 antibody; Lamin B 2; anti-LMNB2 antibody

## PRODUCT SPECIFICATIONS

|                                                 |                                                                                                                                              |
|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| Host                                            | Rabbit                                                                                                                                       |
| Clonality                                       | Polyclonal                                                                                                                                   |
| Isotype                                         | IgG                                                                                                                                          |
| Purity/Purification                             | Antigen-Affinity Chromatography                                                                                                              |
| Form/Format                                     | Supplied as a concentrated solution containing 0.1M Tris, 0.1M Glycine, 10% Glycerol (pH 7.0). 0.01% Thimerosal was added as a preservative. |
| Concentration                                   | 1 mg/ml (varies by lot)                                                                                                                      |
| Sequence Length                                 | 515                                                                                                                                          |
| Applicable Applications for anti-LMNB2 antibody | WB (Western Blot), IHC (Immunohistochemistry)                                                                                                |
| Cross-Reactivity                                | Human                                                                                                                                        |
| Preparation and Storage                         | Store at 4 degree C for short term storage. Aliquot and store at -20 degree C for long term storage. Avoid repeated freeze/thaw cycles.      |

## IMAGES

### WB (Western Blot)

Western blot analysis of 30 ug of whole cell lysate (A: H1299; B: HeLa; C: Hep G2) using a 7.5% SDS PAGE gel and Lamin B2 antibody at a dilution of 1:1000

### IHC (Immunohistochemistry)

Immunohistochemical staining of paraffin-embedded Cal27 Xenograft using Lamin B2 antibody at a dilution of 1:100

ADDITIONAL INFORMATION

|                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Related Product Information for anti-LMNB2 antibody | The nuclear lamina consists of a two-dimensional matrix of proteins located next to the inner nuclear membrane. The lamin family of proteins make up the matrix and are highly conserved in evolution. During mitosis, the lamina matrix is reversibly disassembled as the lamin proteins are phosphorylated. Lamin proteins are thought to be involved in nuclear stability, chromatin structure and gene expression. Vertebrate lamins consist of two types, A and B. This gene encodes one of the two B type proteins, B2. This gene is in a head-to-tail orientation with the gene for the translocase of inner mitochondrial membrane 13 homolog gene. |
| Product Categories/Family for anti-LMNB2 antibody   | Cell Biology                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
