

Thrombin Receptor Peptide Ligand (trifluoroacetate salt) Biochemical

Thrombin Receptor Peptide Ligand (trifluoroacetate salt)

CATALOG #
AAA227172

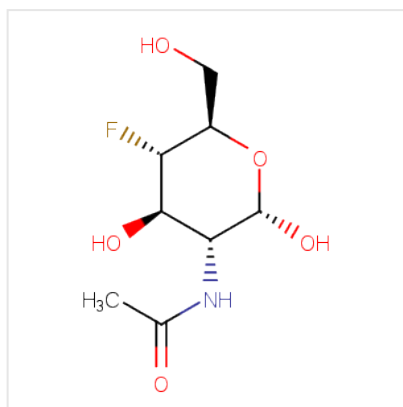

PRODUCT SYNONYMS

Thrombin Receptor Peptide Ligand (trifluoroacetate salt); Thrombin Receptor Peptide Ligand (trifluoroacetate salt) biochemical

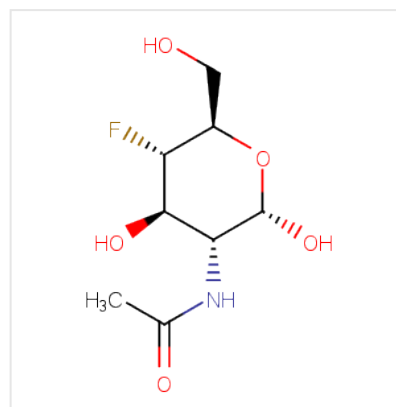

PRODUCT SPECIFICATIONS

Purity/Purification	98%
Solubility	H ₂ O: 1 mg/mL <1mg/ml refers to the product slightly soluble or insoluble
Preparation and Storage	Powder: -20 degree C for 3 years In solvent: -80 degree C for 2 years

IMAGES

Structure
2-Acetamido-2,4-dideoxy-4-fluoro-alpha-D-glucopyranose, CAS 129728-87-6

Structure
2-Acetamido-2,4-dideoxy-4-fluoro-alpha-D-glucopyranose, CAS 129728-87-6

ADDITIONAL INFORMATION

Related Product Information for Thrombin Receptor Peptide Ligand (trifluoroacetate salt) biochemical	Thrombin receptor peptide ligand is antagonist of the thrombin receptor (EC₅₀s = 16-33 uM to inhibit platelet aggregation in vitro). It inhibits alpha-thrombin and platelet aggregation induced by thrombin receptor activating peptide in vitro when used at a concentration of 32 uM but does not affect platelet aggregation induced by ADP or collagen. It also inhibits thrombin- and TRAP-induced proliferation of vascular smooth muscle cells (VSMCs). Thrombin receptor peptide ligand (100 umol/kg bolus, i.v., plus 900 umol/kg infusion) inhibits arterial thrombosis in a rabbit model of partial carotid artery occlusion without increasing bleeding time.
