ADDITIONAL INFORMATION

Related Product Information for DPC-AJ1951 biochemical	DPC-AJ1951 is a peptide agonist of the parathyroid hormone (PTH)/PTH-related peptide receptor (PPR; EC ₅₀ = 0.15 nM in HEK293 cells expressing human PPR). It induces cAMP production in SAOS-2 and UMR106 cells that endogenously express human and rat PPR, respectively (EC ₅₀ s = 2.2 and 1.1 nM, respectively). DPC-AJ1951 stimulates osteoclast-mediated bone resorption in fetal rat long-bone explant cultures and increases collagen synthesis and cell proliferation in neonatal mouse parietal bone explants.
