

Phospho-L-Arginine (lithium salt hydrate) Biochemical

Phospho-L-Arginine (lithium salt hydrate)

CATALOG #
AAA227341

PRODUCT SYNONYMS

Phospho-L-Arginine (lithium salt hydrate); Phospho-L-Arginine (lithium salt hydrate) biochemical

PRODUCT SPECIFICATIONS

Purity/Purification	98%
Solubility	H ₂ O: Soluble <1mg/ml refers to the product slightly soluble or insoluble
Preparation and Storage	Powder: -20 degree C for 3 years In solvent: -80 degree C for 2 years

IMAGES

Structure
RapiFluor-MS, CAS 1429047-69-7

Structure
RapiFluor-MS, CAS 1429047-69-7

ADDITIONAL INFORMATION

Related Product Information for Phospho-L-Arginine (lithium salt hydrate) biochemical	Phospho-L-arginine is a phosphorylated form of L-arginine and a highly diffusible, high-energy metabolite and phosphagen involved in energy storage in invertebrates including crustaceans, insects, and Trypanosoma species. In the locust L. migratoria, phospho-L-arginine is found in the flight muscles, where it acts as both a buffer system and shuttle mechanism for high-energy phosphate. Measurement of phospho-L-arginine by ³¹ P-NMR spectroscopy has been used to study invertebrate energy metabolism in vivo.
