ADDITIONAL INFORMATION

Related Product Information for Tunicamycin 15:1 Mixture biochemical	Tunicamycin 15:1 is a mixture of tunicamycin structural isomers that contain a 15-carbon N-acyl chain with variable branching patterns. The N-acyl chain incorporated into tunicamycins, like tunicamycin 15:1, is derived from the same pool of cellular branched-chain fatty acids (BCFAs) in <i>Streptomyces</i> and directly impacts the biological activity of each individual tunicamycin variant. ^{1,2,3} Purified tunicamycin 15:1 with <i>iso</i> , <i>anteiso</i> , or a mixture of <i>iso</i> and <i>anteiso</i> branching configurations inhibit bacterial phospho-MurNAc-pentapeptide transferase (MraY) with IC ₅₀ values of 0.05, 0.36, and 0.09 μM, respectively. ²
