

ERalpha degrader-2 Biochemical

ERalpha degrader-2

CATALOG #
AAA228234

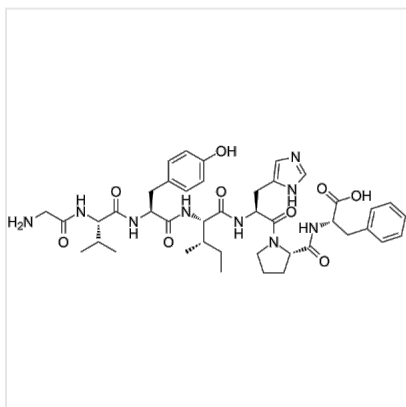

PRODUCT SYNONYMS

ERalpha degrader-2; ERalpha degrader-2 biochemical

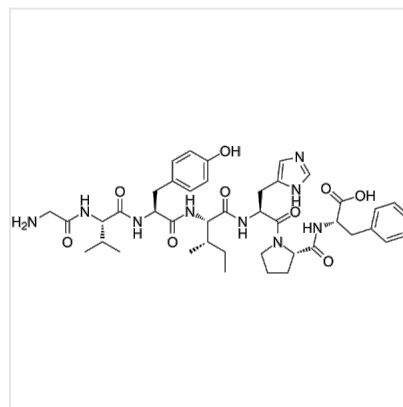

PRODUCT SPECIFICATIONS

Purity/Purification	98%
CAS	2235396-63-9
Targets&IC50	ERalpha:4.6 nM (IC50)
Solubility	<1mg/ml refers to the product slightly soluble or insoluble
In vitro	ERalpha degrader-2 (oral administration; 2-6 mg/kg; QD; 21 days) leads to the significant tumor growth inhibition and decreases tumor volume in mice[1]. ERalpha degrader-2 (oral gavage; 2 mg/kg; single dose) possesses better pharmacokinetic properties than AZD9496, the plasma exposure (AUC) is 16073.7 h/ng/mL, and the half-life period is 12.1 h, the oral availability is 80.5%[1]. Animal Model: MCF-7 human breast cancer xenograft model in nude mice[1]. Dosage: 2 mg/kg; 6 mg/kg. Administration: Oral administration; 2-6 mg/kg; QD; 21 days. Result: Exhibited in vivo efficacy in breast cancer xenograft model.
Preparation and Storage	Powder: -20 degree C for 3 years In solvent: -80 degree C for 2 years

ADDITIONAL INFORMATION

Related Product Information for ERalpha degrader-2 biochemical	ERalpha degrader-2 is a selective estrogen receptor degrader (SERD) with potent binding affinity with ERalpha (IC ₅₀ =17.1 nM), good degradation efficacy (EC ₅₀ =0.3 nM). ERalpha degrader-2 exhibits favorable pharmacokinetic properties and excellent druggability, can be used for HER + breast cancer research.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
