

Human Dipeptidase 3 (DPEP3) ELISA Kit | DPEP3 elisa kit

Human Dipeptidase 3 (DPEP3) ELISA Kit

CATALOG #
AAA23059

REACTIVITY
Human

PRODUCT SYNONYMS

Dipeptidase 3 (DPEP3); Human Dipeptidase 3 (DPEP3) ELISA Kit; MBD3; DPEP3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of DPEP3. No significant cross-reactivity or interference between DPEP3 and analogues was observed.
Sequence Length	493
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	0.312-20ng/mL
Sensitivity	< 0.156ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level DPEP3 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level DPEP3 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for DPEP3 elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of DPEP3 in human serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to DPEP3. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to DPEP3. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain DPEP3, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of DPEP3 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	21313683
NCBI GeneID	71854
NCBI Accession #	NP_082236.1
NCBI GenBank Nucleotide #	NM_027960.2
UniProt Accession #	Q9DA79
Molecular Weight	54,247 Da
NCBI Official Full Name	dipeptidase 3
NCBI Official Synonym Full Names	dipeptidase 3
NCBI Official Symbol	Dpep3
NCBI Official Synonym Symbols	MBD-3; MLZ-136; AI507039; 1700018F16Rik
NCBI Protein Information	dipeptidase 3
UniProt Protein Name	Dipeptidase 3
UniProt Gene Name	Dpep3
UniProt Synonym Gene Names	Mbd3; MBD-3; MLZ-136

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
