ADDITIONAL INFORMATION

Related Product Information for anti-BRD3 antibody	This is a rabbit polyclonal antibody against BRD3. It was validated on Western Blot using a cell lysate as a positive control. Target Description: BRD3 gene was identified based on its homology to the gene encoding the RING3 protein, a serine/threonine kinase. The gene localizes to 9q34, a region which contains several major histocompatibility complex (MHC) genes. The function of this protein is not known.
