ADDITIONAL INFORMATION

Related Product Information for anti-ADRM1 antibody	This is a rabbit polyclonal antibody against ADRM1. It was validated on Western Blot Target Description: The protein encoded by this gene is an integral plasma membrane protein which promotes cell adhesion. The encoded protein is thought to undergo O-linked glycosylation. Expression of this gene has been shown to be induced by gamma interferon in some cancer cells. Two transcript variants encoding the same protein have been found for this gene.
