

Human Hepatitis A Virus IgM (HAVIgM) ELISA Kit | HAVIgM elisa kit

Human Hepatitis A Virus IgM Antibody (HAVIgM) ELISA Kit

CATALOG #
AAA23632

REACTIVITY
Human

PRODUCT SYNONYMS

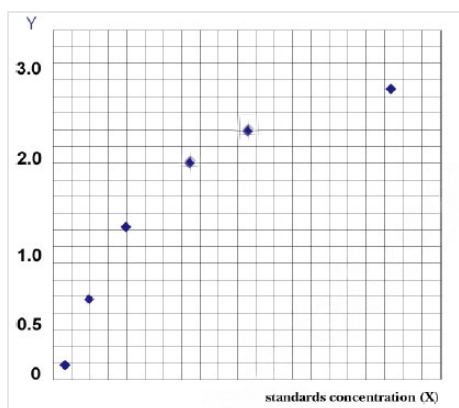

Hepatitis A Virus IgM (HAVIgM); Human Hepatitis A Virus IgM Antibody (HAVIgM) ELISA Kit; HAVIgM elisa kit

PRODUCT SPECIFICATIONS

Reactivity

Human

ADDITIONAL INFORMATION

Related Product Information for HAVIgM elisa kit

Intended Uses: This HAVIGM ELISA kit is intended Laboratory for Research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of HAVIGM in the sample, this HAVIGM ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus HAVIGM concentration. The concentration of HAVIGM in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
