

Bovine CD9 antigen (CD9) ELISA Kit | CD9 elisa kit

Bovine CD9 antigen (CD9) ELISA Kit

CATALOG #
AAA245431

REACTIVITY
Bovine

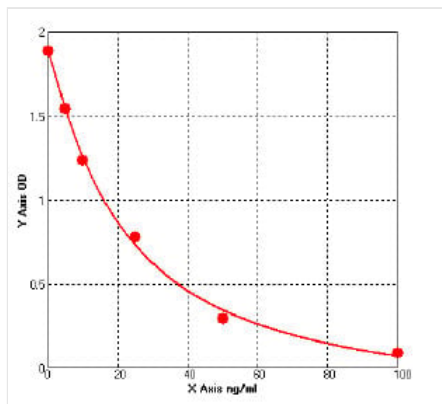

PRODUCT SYNONYMS

CD9 antigen (CD9); Bovine CD9 antigen (CD9) ELISA Kit; CD9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Specificity	This assay has high sensitivity and excellent specificity for detection of CD9. No significant cross-reactivity or interference between CD9 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CD9 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CD9 elisa kit	Principle of the Assay: CD9 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-CD9 antibody and an CD9-HRP conjugate. The assay sample and buffer are incubated together with CD9-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CD9 concentration since CD9 from samples and CD9-HRP conjugate compete for the anti-CD9 antibody binding site. Since the number of sites is limited, as more sites are occupied by CD9 from the sample, fewer sites are left to bind CD9-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CD9 concentration in each sample is interpolated from this standard curve. Intended Uses: This CD9 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine CD9. This ELISA kit for research use only, not for therapeutic or test applications!
