PRODUCT SPECIFICATIONS

Reactivity	Bovine
Specificity	This assay has high sensitivity and excellent specificity for detection of ADAMTSL2. No significant cross-reactivity or interference between ADAMTSL2 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between ADAMTSL2 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ADAMTSL2 elisa kit	Principle of the Assay: ADAMTSL2 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-ADAMTSL2 antibody and an ADAMTSL2-HRP conjugate. The assay sample and buffer are incubated together with ADAMTSL2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ADAMTSL2 concentration since ADAMTSL2 from samples and ADAMTSL2-HRP conjugate compete for the anti-ADAMTSL2 antibody binding site. Since the number of sites is limited, as more sites are occupied by ADAMTSL2 from the sample, fewer sites are left to bind ADAMTSL2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ADAMTSL2 concentration in each sample is interpolated from this standard curve. Intended Uses: This ADAMTSL2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine ADAMTSL2. This ELISA kit for research use only, not for therapeutic or test applications!
