

## Rat F2 Isoprostanes ELISA Kit | losPF2 elisa kit

Rat F2 Isoprostanes ELISA Kit

CATALOG #  
AAA247662

REACTIVITY  
Rat

### PRODUCT SYNONYMS

F2 Isoprostanes; Rat F2 Isoprostanes ELISA Kit; losPF2 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                                                                                                                                                                                                                                                                                  |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of F2-isoPs. No significant cross-reactivity or interference between F2-isoPs and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between F2-isoPs and all the analogues, therefore, cross reaction may still exist in some cases. |
| Assay Type              | Quantitative Competitive                                                                                                                                                                                                                                                                                                                                                                             |
| Samples                 | Serum, plasma, cell culture supernatants, body fluid and tissue homogenate                                                                                                                                                                                                                                                                                                                           |
| Sensitivity             | 1.0 pg/mL                                                                                                                                                                                                                                                                                                                                                                                            |
| Intra-Assay             | CV<10%                                                                                                                                                                                                                                                                                                                                                                                               |
| Inter-Assay             | CV<15%                                                                                                                                                                                                                                                                                                                                                                                               |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                                                                                                                                                                                                                                                                                                                                                  |

|                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Related Product Information for IosPF2 elisa kit</b> | <p>Principle of the Assay: F2-isoPs ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-F2-isoPs antibody and an F2-isoPs-HRP conjugate. The assay sample and buffer are incubated together with F2-isoPs-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the F2-isoPs concentration since F2-isoPs from samples and F2-isoPs-HRP conjugate compete for the anti-F2-isoPs antibody binding site. Since the number of sites is limited, as more sites are occupied by F2-isoPs from the sample, fewer sites are left to bind F2-isoPs-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The F2-isoPs concentration in each sample is interpolated from this standard curve.</p> <p>Intended Uses: This F2-isoPs ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat F2-isoPs. This ELISA kit for research use only, not for therapeutic or test applications!</p> |
