

Monkey BALP (Bone Alkaline Phosphatase) ELISA Kit | BALP elisa kit

Monkey BALP (Bone Alkaline Phosphatase) ELISA Kit

CATALOG #
AAA250970

REACTIVITY
Monkey

PRODUCT SYNONYMS

BALP (Bone Alkaline Phosphatase); Monkey BALP (Bone Alkaline Phosphatase) ELISA Kit; Bone Alkaline Phosphatase; BALP; Alkaline phosphatase; ALPL; BALP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	Specifically recognize BALP, no obvious cross reaction with other analogues
Assay Type	Sandwich
Samples	Serum, plasma, cell culture supernatant and other biological samples
Detection Range	3.125-200ng/ml(100 mU=200ng)
Sensitivity	1.875ng/ml
Intra-assay Precision	Intra-assay Precision: samples with low, medium and high concentration are tested 20 times on same plate.
Inter-assay Precision	Inter-assay Precision: samples with low, medium and high concentration are tested 20 times on three different plates.
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for BALP elisa kit	Principle of the Assay: This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti BALP antibody was pre-coated onto the 96-well plate. The biotin conjugated anti BALP antibody was used as the detection antibody. The standards and pilot samples were added to the wells subsequently. After incubation, unbound conjugates were removed by wash buffer. Then, biotinylated detection antibody was added to bind with BALP conjugated on coated antibody. After washing off unbound conjugates, HRP-Streptavidin was added. After a third washing, TMB substrates were added to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that turned yellow after adding a stop solution. Read the O.D. absorbance at 450nm in a microplate reader. The concentration of BALP in the sample was calculated by drawing a standard curve. The concentration of the target substance is proportional to the OD450 value.
