| Applicable Applications for anti-PSMC6 antibody | IF (Immunofluorescence), ICC (Immunocytochemistry), WB (Western Blot)                                                                                                                                                                              |
| Immunogen                                       | A synthetic peptide corresponding to the N-terminus of the Human PSMC6                                                                                                                                                                             |
| Conjugation                                     | Unconjugated                                                                                                                                                                                                                                       |
| Preparation                                     | Produced in rabbits immunized with a synthetic peptide corresponding to the N-terminus of the Human PSMC6, and purified by antigen affinity chromatography.                                                                                        |
| Preparation and Storage                         | This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Avoid repeated freeze-thaw cycles. |

IMAGES

IF (Immunofluorescence)

Immunofluorescence staining of PSMC6 in HeLa cells. Cells were fixed with 4% PFA, permeabilized with 0.1% Triton X-100 in PBS, blocked with 10% serum, and incubated with rabbit anti-human PSMC6 polyclonal antibody (dilution ratio 1:500) at 4 degree C overnight. Then cells were stained with the Alexa Fluor488-conjugated Goat Anti-rabbit IgG secondary antibody (green). Positive staining was localized to cytoplasm and nucleus.

WB (Western Blot)

Anti-PSMC6 rabbit polyclonal antibody at 1:500 dilutionLane A: HeLa Whole Cell LysateLysates/proteins at 30 ug per lane.SecondaryGoat Anti-Rabbit IgG (H+L)/HRP at 1/10000 dilution.Developed using the ECL technique.Performed under reducing conditions.Predicted band size:46 kDa

| Related Product Information for anti-PSMC6 antibody | PSMC6 (Proteasome 26S Subunit, ATPase 6) is a Protein Coding gene. The PSMC6 gene, located on 14q22.1, is conserved in chimpanzee, Rhesus monkey, dog, cow, and mouse, etc. This gene encodes one of the ATPase subunits, a member of the triple-A family of ATPases which have a chaperone-like activity. Pseudogenes have been identified on chromosomes 8 and 12. PSMC6 is widely expressed in the esophagus, brain, and other tissues. Diseases associated with PSMC6 include Cystic Fibrosis and Pheochromocytoma. The related pathways of PSMC6 are Regulation of activated PAK-2p34 by proteasome-mediated degradation and Antigen processing-Cross presentation. 237 organisms have orthologs with the human gene PSMC6. |
