

Rabbit anti-Human ZNF799 Polyclonal Antibody | anti-ZNF799 antibody

Anti-ZNF799 Antibody, Rabbit Polyclonal

CATALOG # AAA256698	HOST Rabbit	REACTIVITY Human	APPLICATIONS Immunohistochemistry
-------------------------------	-----------------------	----------------------------	---

PRODUCT SYNONYMS

ZNF799; Polyclonal Antibody; Anti-ZNF799 Antibody; Rabbit Polyclonal; ZNF799 Antibody; Rabbit PAb; Antigen Affinity Purified; Anti-HIT-40 Antibody; Anti-ZNF842 Antibody; anti-ZNF799 antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Polyclonal
Isotype	Rabbit IgG
Specificity	Human ZNF799
Purity/Purification	Protein A & Antigen Affinity
Form/Format	Liquid; PBS, pH7.0 with 0.03% Proclin300
Applicable Applications for anti-ZNF799 antibody	IHC (Immunohistochemistry)
Immunogen	E Coli-derived Human ZNF799 fragment
Conjugation	Unconjugated
Preparation	Produced in rabbits immunized with E Coli-derived Human ZNF799 fragment, and purified by antigen affinity chromatography.
Preparation and Storage	This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Avoid repeated freeze-thaw cycles.

IMAGES

IHC (Immunohistochemistry)

Immunochemical staining of human ZNF799 in human liver with rabbit polyclonal antibody at 1:100 dilution, formalin-fixed paraffin embedded sections.

IHC (Immunohistochemistry)

Immunochemical staining of human ZNF799 in human kidney with rabbit polyclonal antibody at 1:100 dilution, formalin-fixed paraffin embedded sections.

ADDITIONAL INFORMATION

Related Product Information for anti-ZNF799 antibody	ZNF799 (Zinc Finger Protein 799) is located on human chromosome 19p13.2. The ZNF799 protein is ubiquitously expressed in placenta, endometrium and other tissues. Structurally, the encoded protein is reported to be 74288 Da in mass. The ZNF799 (also known as HIT-40; ZNF842) gene is conserved in chimpanzee, Rhesus monkey, mouse, and rat. 3 organisms have orthologs with human gene ZNF799. ZNF799 may be involved in transcriptional regulation. ZNF799 is associated with some diseases, such as Spondylolisthesis. Among its related pathways are Gene Expression and Herpes simplex virus 1 infection. ZNF799 is related to nucleic acid binding. An important paralog of this gene is ZNF443.
