### PRODUCT SYNONYMS

CNIH; Polyclonal Antibody; Anti-CNIH Antibody; Rabbit Polyclonal; CNIH/CNIH1 Antibody; Rabbit PAb; Antigen Affinity Purified; cornichon family AMPA receptor auxiliary protein 1; Anti-CNIH-1 Antibody; Anti-CNIL Antibody; Anti-TGAM77 Antibody; anti-CNIH1 antibody

### PRODUCT SPECIFICATIONS

|                                                 |                                                                                                                                                                                                                                                    |

| Host                                            | Rabbit                                                                                                                                                                                                                                             |
| Reactivity                                      | Human                                                                                                                                                                                                                                              |
| Clonality                                       | Polyclonal                                                                                                                                                                                                                                         |
| Isotype                                         | Rabbit IgG                                                                                                                                                                                                                                         |
| Specificity                                     | Human CNIH/CNIH1                                                                                                                                                                                                                                   |
| Purity/Purification                             | Protein A & Antigen Affinity                                                                                                                                                                                                                       |
| Form/Format                                     | Liquid; PBS, pH7.0 with 0.03% Proclin300                                                                                                                                                                                                           |
| Applicable Applications for anti-CNIH1 antibody | IHC (Immunohistochemistry)                                                                                                                                                                                                                         |
| Immunogen                                       | E Coli-derived Human CNIH/CNIH1 fragment                                                                                                                                                                                                           |
| Conjugation                                     | Unconjugated                                                                                                                                                                                                                                       |
| Preparation                                     | Produced in rabbits immunized with E Coli-derived Human CNIH/CNIH1 fragment, and purified by antigen affinity chromatography.                                                                                                                      |
| Preparation and Storage                         | This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Avoid repeated freeze-thaw cycles. |

### IMAGES

#### IHC (Immunohistochemistry)

Immunochemical staining of human CNIH in human kidney with rabbit polyclonal antibody at 1:100 dilution, formalin-fixed paraffin embedded sections.

#### IHC (Immunohistochemistry)

Immunochemical staining of human CNIH in human liver with rabbit polyclonal antibody at 1:100 dilution, formalin-fixed paraffin embedded sections.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
