ADDITIONAL INFORMATION

Related Product Information for anti-ZNF804B antibody	ZNF804B (Zinc Finger Protein 804B, also known as ZNF804B or FLJ32110, LOC219578), located on human chromosome 7q21.13, is a C2H2-type zinc finger protein. The ZNF804B protein is biasedly expressed in thyroid, kidney and other tissue. Structurally, the encoded protein is reported to be 152, 573 Da in mass. ZNF804B protein is expected to have molecular functions (metal ion binding, zinc ion binding) and to localize in intracellular. Mouse Zfp804b is orthologous to human ZNF804B. An important paralog of this gene is GPATCH8. ZNF804B is associated with Body Dysmorphic Disorder.
