

Rabbit anti-Rat RBP4 Polyclonal Antibody | anti-RBP4 antibody

Anti-RBP4 Antibody, Rabbit Polyclonal

CATALOG # AAA257286	HOST Rabbit	REACTIVITY Rat	APPLICATIONS Immunohistochemistry, ELISA
-------------------------------	-----------------------	--------------------------	--

PRODUCT SYNONYMS

RBP4; Polyclonal Antibody; Anti-RBP4 Antibody; Rabbit Polyclonal; RBP4 Antibody; Rabbit PAb; Antigen Affinity Purified; retinol binding protein 4; plasma; anti-RBP4 antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Rat
Clonality	Polyclonal
Isotype	Rabbit IgG
Specificity	Rat RBP4
Purity/Purification	Protein A & Antigen Affinity
Form/Format	Liquid; 0.2um filtered solution in PBS
Applicable Applications for anti-RBP4 antibody	IHC (Immunohistochemistry), ELISA
Immunogen	Recombinant Rat RBP4 protein
Conjugation	Unconjugated
Preparation	Produced in rabbits immunized with purified, recombinant Rat RBP4 (rR RBP4). RBP4 specific IgG was purified by Rat RBP4 affinity chromatography.
Preparation and Storage	This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Preservative-Free. Avoid repeated freeze-thaw cycles.

IMAGES

IHC (Immunohistochemistry)

Immunochemical staining of rat RBP4 in rat kidney with rabbit polyclonal antibody (1:1000, formalin-fixed paraffin embedded sections).

IHC (Immunohistochemistry)

Immunochemical staining of rat RBP4 in rat liver with rabbit polyclonal antibody (1:1000, formalin-fixed paraffin embedded sections).

ADDITIONAL INFORMATION

Related Product Information for anti-RBP4 antibody	Retinol-binding protein 4 (RBP4) is the specific carrier for retinol (also known as vitamin A), and is responsible for the conversion of unstable and insoluble retinol in aqueous solution into stable and soluble complex in plasma through their tight interaction. As a member of the lipocalin superfamily, RBP4 containing a beta-barrel structure with a well-defined cavity is secreted from the liver, and in turn delivers retinol from the liver stores to the peripheral tissues. In plasma, the RBP4-retinol complex interacts with transthyretin (TTR), and this binding is crucial for preventing RBP4 excretion through the kidney glomeruli. RBP4 expressed from an ectopic source efficiently delivers retinol to the eyes, and its deficiency affects night vision largely. Recently, RBP4 as an adipokine, is found to be expressed in adipose tissue and correlated with obesity, insulin resistance (IR) and type 2 diabetes (T2DM).

NCBI AND UNIPROT INFORMATION

NCBI GI #	158187535
NCBI GeneID	25703
NCBI Accession #	NP_037294.1
NCBI GenBank Nucleotide #	NM_013162.1
Molecular Weight	23,220 Da
NCBI Official Full Name	retinol-binding protein 4
NCBI Official Synonym Full Names	retinol binding protein 4, plasma
NCBI Official Symbol	Rbp4
NCBI Official Synonym Symbols	RBPA
NCBI Protein Information	retinol-binding protein 4; PRBP; plasma retinol-binding protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
