| Form/Format                                     | Liquid. PBS, pH7.0 with 0.03% Proclin300                                                                                                                                                                                                                                                                                                                                                                      |
| Applicable Applications for anti-EXOC8 antibody | IP (Immunoprecipitation), WB (Western Blot)                                                                                                                                                                                                                                                                                                                                                                   |
| Immunogen                                       | E Coli-derived Human EXOC8 fragment                                                                                                                                                                                                                                                                                                                                                                           |
| Conjugation                                     | Unconjugated                                                                                                                                                                                                                                                                                                                                                                                                  |
| Preparation                                     | Produced in rabbits immunized with E Coli-derived Human EXOC8 fragment, and purified by antigen affinity chromatography.                                                                                                                                                                                                                                                                                      |
| Preparation and Storage                         | <p>This antibody can be stored at 2-8 degree C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 degree C to -80 degree C. Avoid repeated freeze-thaw cycles.</p> <p>This antibody is shipped as liquid solution at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.</p> |

**IP (Immunoprecipitation)**

EXOC8 was immunoprecipitated using: Lane A: 0.5 mg Jurkat Whole Cell Lysate, 4 uL anti-EXOC8 rabbit polyclonal antibody and 60 ug of Immunomagnetic beads Protein A/G. Primary antibody: Anti-EXOC8 rabbit polyclonal antibody, at 1:100 dilution. Secondary antibody: Goat Anti-Rabbit IgG (H+L)/HRP at 1/10000 dilution. Developed using the ECL technique. Performed under reducing conditions. Predicted band size: 82 kDa. Observed band size: 88 kDa.

**WB (Western Blot)**

Anti-EXOC8 rabbit polyclonal antibody at 1:500 dilution. Lane A: Jurkat Whole Cell Lysate. Lysates/proteins at 30 ug per lane. Secondary: Goat Anti-Rabbit IgG (H+L)/HRP at 1/10000 dilution. Developed using the ECL technique. Performed under reducing conditions. Predicted band size: 82 kDa. Observed band size: 88 kDa. (We are unsure as to the identity of these extra bands.)

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
