

SIRP alpha Active Protein | SIRPA active protein

SIRP alpha Protein, Mouse, Recombinant (hFc Tag)

CATALOG #
AAA258214

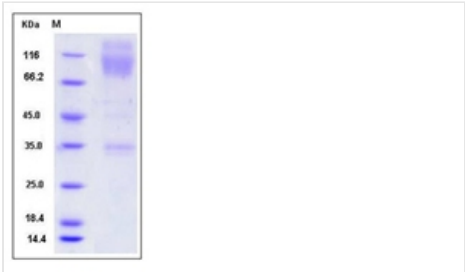

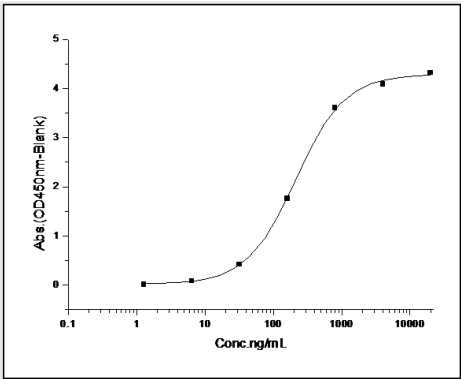

HOST
HEK293 Cells

PRODUCT SYNONYMS

SIRP alpha; SIRP alpha Protein; Mouse; Recombinant (hFc Tag); Mouse SIRP alpha/CD172a Protein (Fc Tag); AI835480 Protein; Bit Protein; CD172a Protein; P84 Protein; Ptpns1 Protein; SHP-1 Protein; SHPS-1 Protein; SIRP Protein; signal-regulatory protein alpha; SIRPA active protein

PRODUCT SPECIFICATIONS

Host	HEK293 Cells
Purity/Purification	>90% as determined by SDS-PAGE
Form/Format	Lyophilized from sterile PBS, pH7.4. Normally 5%-8% trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the hard copy of CoA.
Sequence	Met1-Asn37 3
Species	Mouse
Endotoxin	<1.0EU per ug of the protein as determined by the LAL method
Predicted N Terminal	Thr 32
Tag	C-human IgG1-Fc
Protein Construction	A DNA sequence encoding the extracellular domain of mouse SIRPA (BAA20376.1)(Met 1-Asn 373) was fused with the Fc region of human IgG1 at the C-terminus.
Reconstitution	A hardcopy of COA with reconstitution instruction is sent along with the products. Please refer to it for detailed information.
Activity	Measured by its binding ability in a functional ELISA. Immobilized rat CD47-His at 10ug/ml (100uL/well) can bind mouse SIRPA-Fc. The EC50 of mouse SIRPA-Fc is 0.6-1.4ug/ml.
Preparation and Storage	Samples are stable for up to twelve months from date of receipt at -20 degree C to -80 degree C. Store it under sterile conditions at -20 degree C to -80 degree C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature. Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice.

SDS-PAGE

Application Data
Measured by its binding ability in a functional ELISA. Immobilized rat CD47-His at 10 ug/ml (100 ul/well) can bind mouse SIRPA-Fc. The EC50 of mouse SIRPA-Fc is 0.6-1.4 ug/ml.

ADDITIONAL INFORMATION

Related Product Information for SIRPA active protein	Background: Tyrosine-protein phosphatase non-receptor type substrate 1, also known as SHP substrate 1, Inhibitory receptor SHPS-1, Brain Ig-like molecule with tyrosine-based activation motifs, Macrophage fusion receptor, CD172 antigen-like family member A, SIRPA and CD172a, is a single-pass type I membrane protein which contains two Ig-like C1-type (immunoglobulin-like) domains and one Ig-like V-type (immunoglobulin-like) domain. SIRPA is ubiquitously expressed. It is highly expressed in brain and detected at lower levels in heart, placenta, lung, testis, ovary, colon, liver, small intestine, prostate, spleen, kidney, skeletal muscle and pancreas. It is also detected on myeloid cells, but not T-cells. SIRPA is an immunoglobulin-like cell surface receptor for CD47. SIRPA acts as docking protein and induces translocation of PTPN6, PTPN11 and other binding partners from the cytosol to the plasma membrane. SIRPA supports adhesion of cerebellar neurons, neurite outgrowth and glial cell attachment. It may play a key role in intracellular signaling during synaptogenesis and in synaptic function. SIRPA is involved in the negative regulation of receptor tyrosine kinase-coupled cellular responses induced by cell adhesion, growth factors or insulin. It mediates negative regulation of phagocytosis, mast cell activation and dendritic cell activation.

NCBI AND UNIPROT INFORMATION

NCBI GI #	2190257
NCBI GeneID	19261
Molecular Weight	32,145 Da
NCBI Official Full Name	BIT
NCBI Official Synonym Full Names	signal-regulatory protein alpha
NCBI Official Symbol	Sirpa
NCBI Official Synonym Symbols	Bit; P84; SIRP; SHP-1; CD172a; Ptpns1; SHPS-1; A1835480
NCBI Protein Information	tyrosine-protein phosphatase non-receptor type substrate 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
