

Pleiotrophin/PTN Active Protein | PTN active protein

Pleiotrophin/PTN Protein, Mouse, Recombinant

CATALOG #
AAA258219

HOST
Baculovirus-Insect Cells

PRODUCT SYNONYMS

Pleiotrophin/PTN; Pleiotrophin/PTN Protein; Mouse; Recombinant; Mouse Pleiotrophin/PTN/HB-GAM Protein; HARP Protein; HB-GAM Protein; HBBN Protein; HBGF-8 Protein; HBNF Protein; OSF Protein; Osf-1 Protein; Osf1 Protein; pleiotrophin; PTN active protein

PRODUCT SPECIFICATIONS

Host	Baculovirus-Insect Cells
Purity/Purification	>95% as determined by SDS-PAGE
Form/Format	Lyophilized from sterile 20mM Tris, 1M NaCl, pH7.4. Normally 5%-8% trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the hard copy of CoA.
Sequence	Met1-Asp16 8
Species	Mouse
Endotoxin	<1.0EU per ug of the protein as determined by the LAL method
Predicted N Terminal	Gly 33
Tag	Native
Protein Construction	A DNA sequence encoding the mouse PTN (P63089)(Met1-Asp168) was expressed.
Reconstitution	A hardcopy of COA with reconstitution instruction is sent along with the products. Please refer to it for detailed information.
Activity	Measured by its binding ability in a functional ELISA. Immobilized mouse PTN at 10ug/ml (100uL/well) can bind rat SDC1-Fc. The EC50 of rat SDC1-Fc is 0.4-1.1ug/ml.
Preparation and Storage	Samples are stable for up to twelve months from date of receipt at -20 degree C to -80 degree C. Store it under sterile conditions at -20 degree C to -80 degree C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature. Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice.

IMAGES

Application Data
Measured by its binding ability in a functional ELISA. Immobilized mouse PTN at 10 ug/ml (100 ul/well) can bind rat SDC1-Fc, The EC50 of rat SDC1-Fc is 0.4-1.1 ug/ml.

ADDITIONAL INFORMATION

Related Product Information for PTN active protein	Background: HB-GAM belongs to the pleiotrophin family. During embryonic and early postnatal development, HB-GAM is expressed in the central and peripheral nervous system and also in several non-neural tissues, notably lung, kidney, gut and bone. While in the adult central nervous system, it is expressed in an activity-dependent manner in the hippocampus where it can suppress long term potentiation induction. HB-GAM has a low expression in other areas of the adult brain, but it can be induced by ischemic insults, or targeted neuronal damage in the entorhinal cortex or in the substantia nigra pars compacta. It is structurally related to midkine and retinoic acid induced heparin-binding protein and has a high affinity for heparin. HB-GAM binds anaplastic lymphoma kinase (ALK) which induces MAPK pathway activation, an important step in the anti-apoptotic signaling of PTN and regulation of cell proliferation. It also functions as a secreted growth factor and induces neurite outgrowth and which is mitogenic for fibroblasts, epithelial, and endothelial cells.

NCBI AND UNIPROT INFORMATION

NCBI GI #	6679543
NCBI GeneID	19242
NCBI Accession #	NP_032999.1
NCBI GenBank Nucleotide #	NM_008973.2
UniProt Accession #	P63089; P20935
Molecular Weight	18,869 Da
NCBI Official Full Name	pleiotrophin
NCBI Official Synonym Full Names	pleiotrophin
NCBI Official Symbol	Ptn
NCBI Official Synonym Symbols	OSF; HARP; HBBN; HBNF; Osf1; Osf-1; HB-GAM; HBGF-8
NCBI Protein Information	pleiotrophin
UniProt Protein Name	Pleiotrophin
UniProt Gene Name	Ptn

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
