| Form/Format                                                  | Liquid; 0.2um filtered solution in PBS                                                                                                                                                                                                                                                               |
| Concentration                                                | 1.18 mg/ml (varies by lot)                                                                                                                                                                                                                                                                           |
| Applicable Applications for anti-BAFF/BLyS/TNFSF13B antibody | ELISA                                                                                                                                                                                                                                                                                                |
| Immunogen                                                    | Recombinant Human BAFF/BLyS Protein                                                                                                                                                                                                                                                                  |
| Preparation                                                  | This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Human BAFF/BLyS (rh BAFF/BLyS). The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography. |
| Preparation and Storage                                      | This antibody can be stored at 2-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.                                                     |

### ADDITIONAL INFORMATION

|            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
