

Mouse IL-17E ELISA Kit | IL25 elisa kit

Mouse IL-17E ELISA Kit

CATALOG # AAA261648	REACTIVITY Mouse	APPLICATIONS ELISA
-------------------------------	----------------------------	------------------------------

PRODUCT SYNONYMS

IL-17E; Mouse IL-17E ELISA Kit; IL17E; Interleukin-25; IL-25; Interleukin-17E; IL25 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	The Mouse IL-17E ELISA Kit allows for the detection and quantification of endogenous levels of natural and/or recombinant Mouse IL-17E proteins within the range of 31.3 pg/ml - 2000 pg/ml.
Sequence Length	169
Samples	Cell Culture Supernatants, Serum, Plasma.
Sensitivity	15 pg/ml.
Applicable Applications for IL25 elisa kit	ELISA (Sandwich ELISA)
Preparation and Storage	Shipped and store at 4 degree C for 6 months, store at -20 degree C for one year. Avoid freeze/thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for IL25 elisa kit	Principle of the Assay The Mouse IL-17E ELISA (Enzyme-Linked Immunosorbent Assay) kit is an in vitro enzyme-linked immunosorbent assay for the quantitative measurement of Mouse IL-17E in Cell Culture Supernatants, Serum, Plasma. This assay employs an antibody specific for Mouse IL-17E coated on a 96-well plate. Standards and samples are pipetted into the wells and IL-17E present in a sample is bound to the wells by the immobilized antibody. The wells are washed and biotinylated anti-Mouse IL-17E antibody is added. After washing away unbound biotinylated antibody, HRP-conjugated streptavidin is pipetted to the wells. The wells are again washed, a TMB substrate solution is added to the wells and color develops in proportion to the amount of IL-17E bound. The Stop Solution changes the color from blue to yellow, and the intensity of the color is measured at 450 nm. Background/Introduction: Interleukin-25 (IL-25), also known as interleukin-17E (IL-17E), is a protein that in humans is encoded by the IL25 gene. It is a cytokine that belongs to the IL-17 cytokine family and mapped to 14q11.2. IL-25 is secreted by type 2 helper T cells (Th2) and mast cells. It has been found that IL-25 can induce Th2-type cytokine expression and production by non-T, non-B accessory cells that express high levels of major histocompatibility complex class II and low levels of Cd11c. This cytokine also can induce NF-kappaB activation, and stimulate the production of IL8. What's more, IL-25 is an important molecule controlling immunity of the gut and has been implicated in chronic inflammation associated with the gastrointestinal tract.

NCBI AND UNIPROT INFORMATION

NCBI GI #	81867202
UniProt Accession #	Q8VHH8
Molecular Weight	19,210 Da
NCBI Official Full Name	IL25 (Interleukin 25)
UniProt Protein Name	IL25
UniProt Gene Name	IL25
UniProt Entry Name	Q8VHH8_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
