

Mouse TSLP ELISA Kit | TSLP elisa kit

Mouse TSLP ELISA Kit

CATALOG # AAA261770	REACTIVITY Mouse	APPLICATIONS ELISA
-------------------------------	----------------------------	------------------------------

PRODUCT SYNONYMS

TSLP; Mouse TSLP ELISA Kit; Thymic stromal lymphopoietin; TSLP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	The Mouse TSLP ELISA Kit allows for the detection and quantification of endogenous levels of natural and/or recombinant Mouse TSLP proteins within the range of 15.6 pg/ml - 1000 pg/ml.
Sequence Length	140
Samples	Cell Culture Supernatants, Serum, Plasma.
Sensitivity	7 pg/ml.
Applicable Applications for TSLP elisa kit	ELISA (Sandwich ELISA)
Preparation and Storage	Shipped and store at 4 degree C for 6 months, store at -20 degree C for one year. Avoid freeze/thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for TSLP elisa kit	Principle of the Assay The Mouse TSLP ELISA (Enzyme-Linked Immunosorbent Assay) kit is an in vitro enzyme-linked immunosorbent assay for the quantitative measurement of Mouse TSLP in Cell Culture Supernatants, Serum, Plasma. This assay employs an antibody specific for Mouse TSLP coated on a 96-well plate. Standards and samples are pipetted into the wells and TSLP present in a sample is bound to the wells by the immobilized antibody. The wells are washed and biotinylated anti-Mouse TSLP antibody is added. After washing away unbound biotinylated antibody, HRP-conjugated streptavidin is pipetted to the wells. The wells are again washed, a TMB substrate solution is added to the wells and color develops in proportion to the amount of TSLP bound. The Stop Solution changes the color from blue to yellow, and the intensity of the color is measured at 450 nm. Background/Introduction: Thymic stromal lymphopoietin, also called TSLP is a protein belonging to the cytokine family. This gene is mapped to 5q22.1. It encodes a hemopoietic cytokine proposed to signal through a heterodimeric receptor complex composed of the thymic stromal lymphopoietin receptor and the IL-7R alpha chain. It mainly impacts myeloid cells and induces the release of T cell-attracting chemokines from monocytes and enhances the maturation of CD11c (+) dendritic cells. The protein promotes T helper type 2 (TH2) cell responses that are associated with immunity in various inflammatory diseases, including asthma, allergic inflammation and chronic obstructive pulmonary disease. The protein is therefore considered a potential therapeutic target for the treatment of such diseases.

NCBI AND UNIPROT INFORMATION

NCBI GI #	81868532
NCBI GeneID	53603
UniProt Accession #	Q9JIE6
Molecular Weight	16,152 Da
NCBI Official Full Name	Thymic stromal lymphopoietin
NCBI Official Synonym Full Names	thymic stromal lymphopoietin
NCBI Official Symbol	Tslp
NCBI Protein Information	thymic stromal lymphopoietin
UniProt Protein Name	Thymic stromal lymphopoietin
UniProt Gene Name	Tslp
UniProt Entry Name	TSLP_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
