

General Heme Assay Kit | Heme assay kit

Heme Microplate Assay Kit

CATALOG # AAA263949	REACTIVITY General	APPLICATIONS Functional Assay
-------------------------------	------------------------------	---

PRODUCT SYNONYMS

Heme; Heme Microplate Assay Kit; Heme assay kit

PRODUCT SPECIFICATIONS

Reactivity	General
Applicable Applications for Heme assay kit	FA (Functional Assay)
Preparation and Storage	Store at 4 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Heme assay kit

Background/Introduction: HBeAg is the extracellular form of HBcAg (Hepatitis B viral protein, core antigen), hence why the presence of both are markers of viral replication, and antibodies to these antigens are markers of a decline in replication. Multiple protein products can be produced from the same DNA sequence. When "ORF Core" and "Pre C" are translated together, the result is "HBeAg". Both HBeAg and HBcAg are made from the same reading frame, but HBeAg is secreted from cells and accumulates in serum as an immunologically distinct soluble antigen. HBeAg is secreted and found in the serum of patients and serves as a marker of active replication in chronic hepatitis.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
