| <b>Host</b>                                            | Rabbit                                                                                                                                       |
| <b>Reactivity</b>                                      | Human, Mouse, Rat                                                                                                                            |
| <b>Clonality</b>                                       | Polyclonal                                                                                                                                   |
| <b>Specificity</b>                                     | Recognizes endogenous levels of CD115 (pY723) protein.                                                                                       |
| <b>Purity/Purification</b>                             | Purified by Immunogen Affinity Chromatography                                                                                                |
| <b>Form/Format</b>                                     | Liquid in 0.42% Potassium Phosphate, 0.87% Sodium Chloride, pH 7.3, 30% Glycerol, and 0.01% Sodium Azide.                                    |
| <b>Applicable Applications for anti-CD115 antibody</b> | IHC (Immunohistochemistry), WB (Western Blot)                                                                                                |
| <b>Immunogen</b>                                       | KLH-conjugated synthetic peptide encompassing a sequence within the center region of human CD115 (pY723). The exact sequence is proprietary. |
| <b>Preparation and Storage</b>                         | Upon delivery aliquot and store at -20 degree C for one year. Avoid freeze/thaw cycles.                                                      |

### IMAGES

#### IHC (Immunohistochemistry)

Immunohistochemical analysis of CD115 (pY723) staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

#### WB (Western Blot)

Western blot analysis of CD115 (pY723) expression in C6 (A) whole cell lysates.
