| Purity/Purification                              | Affinity purified by Protein A                                                                                                                                                                                                                                                                                                                      |
| Form/Format                                      | Preservative: 15mM Sodium Azide, Constituents: 1% BSA, 0.01M PBS, pH 7.4                                                                                                                                                                                                                                                                            |
| Applicable Applications for anti-DNCLI1 antibody | IHC (Immunohistochemistry), WB (Western Blot)                                                                                                                                                                                                                                                                                                       |
| Immunogen                                        | KLH conjugated synthetic peptide derived from human DNCLI1 451-550/523                                                                                                                                                                                                                                                                              |
| Preparation and Storage                          | Store at -20 degree C for one year. Avoid repeated freeze/thaw cycles.<br>The lyophilized antibody is stable at room temperature for at least one month and for greater than a year when kept at -20 degree C. When reconstituted in sterile pH 7.4 0.01M PBS or diluent of antibody the antibody is stable for at least two weeks at 2-4 degree C. |
