

Human Cortisol ELISA Kit

Cortisol ELISA (Saliva)

CATALOG #
AAA269049

REACTIVITY
Human

PRODUCT SYNONYMS

Cortisol; Cortisol ELISA (Saliva); Cortisol elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Detection Range	7 ug/L -200 ug/L
Preparation and Storage	Store at 4 degree C Shipping: Gel Ice

ADDITIONAL INFORMATION

Related Product Information for Cortisol elisa kit

Principle of the Assay: The kit assay Human Cortisol level in the sample, use Purified Human Cortisol antibody to coat microtiter plate wells, make solid-phase antibody, then add Cortisol to wells, Combined Cortisol antibody which With HRP labeled, become antibody - antigen - enzyme-antibody complex, after washing Completely, Add TMB substrate solution,TMB substrate becomes blue color At HRP enzyme-catalyzed, reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. The concentration of Human Cortisol in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
