

Mouse EPO (Erythropoietin) ELISA Kit | EPO elisa kit

Mouse EPO (Erythropoietin) ELISA Kit

CATALOG #
AAA269827

REACTIVITY
Mouse

PRODUCT SYNONYMS

EPO (Erythropoietin); Mouse EPO (Erythropoietin) ELISA Kit; EP; Epoetin; Erythropoetin; Hematopoietin; Hemopoietin; EPO elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	serum, plasma, tissue homogenates, cell lysates and other biological fluids
Assay Type	Sandwich
Detection Range	6.25-400 pg/mL
Sensitivity	2.68 pg/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for EPO elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Erythropoietin(EPO). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Erythropoietin(EPO). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Erythropoietin(EPO), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Erythropoietin(EPO) in the samples is then determined by comparing the OD of the samples to the standard curve.
