

Human MMP8 (Matrix Metalloproteinase 8) ELISA Kit | MMP8 elisa kit

Human MMP8 (Matrix Metalloproteinase 8) ELISA Kit

CATALOG #
AAA269935

REACTIVITY
Human

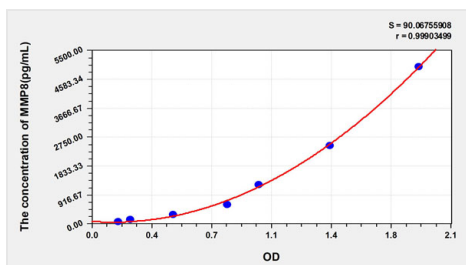

PRODUCT SYNONYMS

MMP8 (Matrix Metalloproteinase 8); Human MMP8 (Matrix Metalloproteinase 8) ELISA Kit; CLG2; HNC; PMNL-CL; Collagenase 2; Neutrophil Collagenase; PMNL collagenase; MMP8 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Sandwich
Detection Range	78.13-5000 pg/mL
Sensitivity	28 pg/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for MMP8 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Matrix Metalloproteinase 8(MMP8). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Matrix Metalloproteinase 8(MMP8). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Matrix Metalloproteinase 8(MMP8), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Matrix Metalloproteinase 8(MMP8) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for MMP8 elisa kit

Enzyme & Kinase; Infection immunity; Cardiovascular biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
