

## Human SDF1 (Stromal Cell Derived Factor 1) ELISA Kit | SDF1 elisa kit

Human SDF1 (Stromal Cell Derived Factor 1) ELISA Kit

CATALOG #  
**AAA269946**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

SDF1 (Stromal Cell Derived Factor 1); Human SDF1 (Stromal Cell Derived Factor 1) ELISA Kit; CXCL12; PBSF; P-BSF; SCYB12; SDF1-A; SDF1-B; SDF1A; SDF1B; TLSF-A; TLSF-B; TPAR1; Pre-B Cell Growth-Stimulating Factor; Chemokine C-X-C-Motif Ligand 12; SDF1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                      |
|-------------------------|------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                |
| Samples                 | serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids |
| Assay Type              | Sandwich                                                                                             |
| Detection Range         | 0.16-10 ng/mL                                                                                        |
| Sensitivity             | 0.057 ng/mL                                                                                          |
| Intra-assay Precision   | CV%<8%                                                                                               |
| Inter-assay Precision   | CV%<10%                                                                                              |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                     |

### ADDITIONAL INFORMATION

#### Related Product Information for SDF1 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Stromal Cell Derived Factor 1(SDF1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Stromal Cell Derived Factor 1(SDF1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Stromal Cell Derived Factor 1(SDF1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Stromal Cell Derived Factor 1(SDF1) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for SDF1 elisa kit

Cytokine; Tumor immunity; Infection immunity

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
