

Human S100P (S100 Calcium Binding Protein P) ELISA Kit | S100P elisa kit

Human S100P (S100 Calcium Binding Protein P) ELISA Kit

CATALOG #
AAA270014

REACTIVITY
Human

PRODUCT SYNONYMS

S100P (S100 Calcium Binding Protein P); Human S100P (S100 Calcium Binding Protein P) ELISA Kit; S100-P; MIG9; S100-E; Migration-inducing gene 9 protein; S100P elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.067 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for S100P elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to S100 Calcium Binding Protein P(S100P). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to S100 Calcium Binding Protein P(S100P). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain S100 Calcium Binding Protein P(S100P), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of S100 Calcium Binding Protein P(S100P) in the samples is then determined by comparing the OD of the samples to the standard curve.
